How Can Assistive Educational Technology Benefit My Child?

Edtech can assist students who

struggle with learning disabilities, especially for those who have issues with language processing.

Hundreds of new edtech tools come out every day for students with learning disabilities and it is important to take the time to understand the student's personality and learning style before jumping ahead into implementation. Before determining which edtech will benefit your child, parents and teachers must figure out how the student's brain works with words and sound so that the tools can be personalized for the student. Figuring out how the student

processes language is a critical part of mapping edtech to the student.

Here are some of SFL's recommendations. We encourage you to speak with your SFL clinicians to determine if these recommendations will benefit your child.

Dragon Speak (\$59.99)

Speech-Recognition Software. It can check your assignments, memos and letters quickly and easily. Dragon's natural-sounding text-to-speech or audio playback of your own dictation takes the reading out of proofreading.

[Learn More](#)

Rewordify (Free)

Online software that improves reading, learning, and teaching. This site can intelligently simplify difficult English, for faster comprehension, effectively teach words, for building a better vocabulary, and more.

[Learn More](#)

Inspiration (\$9.99-\$39.95)

Online software and Apple app. Uses visual learning to help students better understand and retain information. Utilizes graphic organizers, mind-mapping, diagrams and outlines.

[Learn More](#)

Voice Dream (\$14.99)

Apple and Andriod App. Turns any text into speech. Voice Dream Writer proofreads your writing with text to speech. You can pause, rewind, change speed. Change font, size, spacing, color for optimal readability.

[Learn More](#)

LiveScribe Smart Pens (\$179.95)

Smartpens can capture everything you hear and write so you can be confident that you'll never miss a word. No matter what your learning style is, a smartpen lets you capture words, scribbles and diagrams and syncs everything to what is said.

Free Upcoming Parent Education Lectures

Featuring SfL clinicians, Ariela Perlman & Maria Howard

Task Initiation: A Key Executive Functioning Skill

Speaker: Ariela Perlman, MS and Maria Howard, MS

Date: Thursday, May 25, 2017

Time: 6:30 – 8:00 pm

Location: Ann Martin Center, 1375 55th Street, Emeryville, CA

1375 55th Street, Emeryville, CA 94608
(510) 655-7880 • www.annmartin.org

For youth with weak executive functioning skills, one of the most difficult parts of accomplishing work can often be just getting started. This workshop will help parents better understand how struggles with task initiation are experienced by students across grade levels. Actionable suggestions for both academic and home-based supports will also be explored.
